

Sirs: I am very much against lowering or doing away with the rules that keep huge International Corporations and Large Corporations from taking over more of our electronic media. They own too much of the media now, and our nation's media is a mess because of it. There should be more rules that would keep the media owned and controlled locally. Electronic Media news is especially a shameful, biased, undiverse, radical, undependable, untrustworthy, propaganda spewing, mess, controlled by a handful of people from large corporations. There should be laws made to make the ownership of media outlets more diverse, locally owned, and locally controlled. Among all of my friends, I have not talked to one who believes that TV or Radio news is credible or is as it should be. Your job is to be a voice for the people, not to make more profits and give more power to Big Corporations. Big Corporations should not be allowed to do what they are doing to electronic media. Also, television programs have become so filthy and immoral, they make me ashamed to turn on my tv if children are in my house. Do something about it please! Don't turn more of our media over to these filthy, money grubbing, greedy, Corporations! Thank You.

Bob Christian
